

Centralized Intelligence Dashboard

A bird's eye view of your entire multi-site security operation

For organizations that use our OnWatch watchlist alerting system within multiple facilities around the nation or even the world, working with a holistic solution that drives operational excellence and security is the first step in ensuring the safety of staff, customers, and visitors alike.

Having a single, centralized intelligence dashboard that showcases everything that's going on within your entire organization provides your HQ security staff with the data and information they need (in real-time) in order to eliminate repeated offenses, prevent multi-site targeted threats, and operate at a higher level of efficiency.

Top 5 challenges facing multi-site security and operations teams

Being able to manage and monitor the organization's entire security operations from a single place, whether it's national or international.

Knowing when a repeated offender has been spotted in a different site in real-time so preventative measures can be taken.

Immediately get an alert when a POI from the watchlist is captured by a camera on one of your connected sites or within your headquarters.

Provide sites the ability to share information on POIs they believe to be dangerous or harmful to the entire business.

Disperse and share data and POI information to relevant sites that may encounter a specific POI.

Centralized Intelligence Dashboard:
A bird's eye view of your entire multi-site security operation

Capabilities that solve these challenges

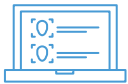

Detections & Recognitions Gallery

View detections and recognitions as they occur across your sites in real-time or search through historical video footage for a specific POI in a matter of seconds.

Site POI Approvals

Eliminate repeated offences and bridge the gap between multiple business locations by allowing operators to share info on POIs they believe to be a local, national, or global threat.

Centralized Dashboard

Access, monitor, and manage real-time detections and recognitions from all your sites on approved site POIs or HQ POIs, including their recognition timeline, descriptions, and more.

Recognition Alerts

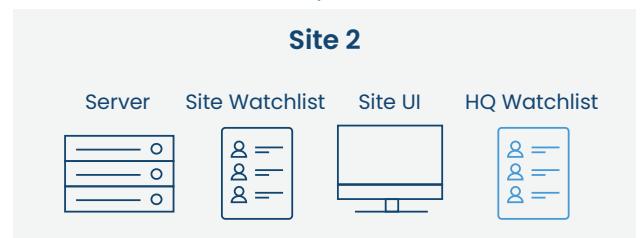

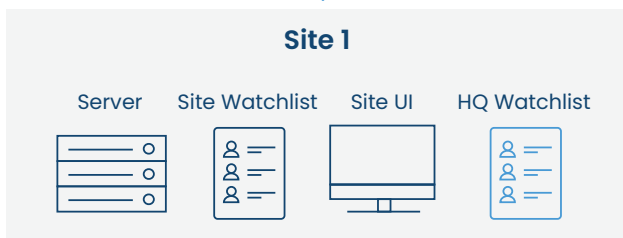

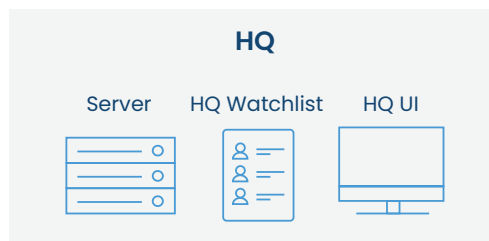

Automatically receive an alert whenever a POI is spotted at any one of your sites, directly on the dashboard UI.

Distributed Architecture

Automatically disburse POIs from a headquarters watchlist to any site watchlist you choose, based on location or any other use case.

Centralized Intelligence Architecture

About Oosto

Oosto is the world's leading developer of visual AI platforms, helping Tier 1 brands across the globe create trusted, seamless experiences for their customers and employees. Our solutions are built to function on any sensor, with any resolution, and are proven to operate in real-time and real-world scenarios. We bring together the best and brightest minds in AI, deep learning and computer vision to make the world a safer, more intuitive and more connected place.

For more information, please contact us at: info@oosto.com

Oosto does not offer, sell or make available any of its products or services to customers in the EU for the use of real-time remote biometric identification systems in publicly accessible spaces for the purposes of law enforcement or any of the other prohibited AI practices as outlined in the EU AI Act.
